DETAILED ACTION

This office action is in response to claims received on 4/9/07.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14,16,17,19,20,22-24 and 36-40, drawn to a delivery device for delivering an implant to an anatomical site in a body of a patient, classified in class 606, subclass 232.
- II. Claims 25-33, drawn to a method of delivering an implant to an anatomical site in a body of a patient, classified in class 606, subclass 232.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case invention I can be used differently than described in invention II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
